

Competition Economist - full-time positions (Brussels)

About CDC Cartel Damage Claims (CDC):

CDC is Europe's first mover and leading specialist in the enforcement of damage claims resulting from infringements of competition law. We run large, complex litigations enabling victims of cartels to recuperate damages. As part of our team, you will be contributing to economic analyses in present and future cases. With your contributions, we are looking to expand our activities in pursuing damage claims stemming from cartels and abusive conduct. Our approach is pan-European and interdisciplinary, combining technical, legal and economic know-how. We understand that effective communication should be transparent and free of hierarchy and that job satisfaction is greatest when you can identify with the goals of the company. We are looking for an energetic team player who can bolster our capabilities for the Brussels office.

Your responsibilities in the domains of economic analysis, research and data collection are:

- Economic analysis for litigation purposes and out-of-court settlements in ongoing and future cases;
- Economic assessment of potential claims and the development of theories of harm;
- Building up expert knowledge on relevant markets, products and the infringements;
- Evaluation of public data, corporate and investor information, industry studies, economic aspects of cartel and merger decisions and court judgments;
- Cooperation with external economic advisors, market experts, and consultancies;
- Reviews of economic research and applicability to competition litigation;
- All aspects of data collection, standardisation, quality management, security, reliability, evaluation and presentation;
- Communication with damaged companies on aspects related to transaction and survey data, evidence and economic analysis.

Requirements:

- Ability to think critically and creatively and to communicate thoughts clearly in English;
- Attention to detail, strong communication skills and an entrepreneurial mindset;
- A master's degree in economics, with a focus on competition economics and empirical analysis;
- Ability to organize large data gathering and cleaning projects involving a multitude of heterogeneous data sources;
- Hands-on experience with programming languages and software packages for data and statistical analysis e.g. Python, STATA, R, SPSS, SAS or similar;
- An Interest in understanding the legal environment and IT challenges shaping our business.

Nice to have (but not required):

- Fluency in other languages widely spoken in the EU;
- Advanced knowledge of MS Office suite;
- Experience, education or interest in business studies, computer science or law;
- Professional working experience of 2+ years in competition economics consultancy;
- An entrepreneurial spirit.

What we offer:

- A diverse field of activity in an international context.

- A competitive salary.
- Friendly and fun colleagues.
- An appreciative and recognizing management culture.

This is a unique opportunity in a fast-growing and dynamic environment at the cutting edge of competition law and economics. Besides a full-time employment contract CDC offers attractive growth perspectives and performance-based compensation schemes.
